Shrimp and Fish Farms and Farmer Groups

Turn pond-side records into evidence buyers and auditors accept, without adding paperwork to the farm day.

Advisory · Implementation · Digital

Who This Is For

- Shrimp farms
- Fish farms
- Farmer groups and clusters
- Integrators working with contract farms

Where You Sit in the Supply Chain

PRODUCER (You) → AGGREGATOR → PROCESSOR → MANUFACTURER → EXPORTER → BUYER

You are the source. Processors and buyers rely on your crop records.

How S360 Works

Know the source › Build the evidence › Understand the risk › Take action › Be able to show it

What We Often Hear

- Pond records for stocking, feed, water quality and treatments are often kept on paper.
- Buyers ask for evidence of responsible input use and worker conditions.
- Small farms can find it hard to meet audit expectations alone.
- Records are often pulled together only when an audit or buyer visit is near.

What S360 Does

The same integrated capability, scoped around what your customers, markets and requirements ask of you.

Advisory

Understand

- Farm-level gap assessment
- Group or cluster approach for small farms
- Environmental and social risk review

Implementation

Put it in place

- Farm manuals and record formats
- Internal inspections and worker welfare records
- Certification readiness and corrective action closure

Digital

Keep it running

- Pond and crop-cycle logs on mobile
- Input use registers
- Farm visit checklists for groups

Requirements This Covers

ASC farm standard | BAP farm standard | SHAPHARI | Buyer and export requirements

S360 is the system, not the requirement. Standards, regulations and buyer requirements are inputs; we build one way of working that answers them together. Contributes to SDG 14, Life Below Water.

S360 is not a certification body. We support organisations in understanding applicable standards, implementing management systems, preparing evidence, conducting internal assessments and preparing for independent certification audits. Where certification is required, certification decisions are made independently by the relevant certification body.

Questions We Are Asked

Does S360 certify my organisation?

No. S360 is not a certification body. We help you prepare; certification decisions rest with independent certification bodies.

Can we use the digital platform on its own?

Yes. Modules may be used independently, inside an implementation engagement, or connected to the systems you already run.

Do you work with what we already have?

Yes. We start from your current procedures, records and systems, and keep what already works.

What Changes When the Record Is Digital

TODAY	WITH S360
Pond records in notebooks	Crop-cycle records captured on a phone at the pond
Input use reconstructed for the buyer	Each input logged with date, pond and quantity
Each farm prepares alone	Group records and inspections managed in one place

Document Management

Structured evidence and document lifecycle, retrievable by supplier, delivery or date.

Workflow

Configurable approval processes and corrective action to verified closure.

Traceability

Source-to-market mapping, with volumes that reconcile.

Services are scoped around each organisation's requirements. Digital modules may be offered independently, as part of implementation engagements, or as integrated solutions.

How We Work With You

01
Scope
Understand your supply base, customers and the requirements you face.

02
Assess
Review current practice, records and risk against those requirements.

03
Design
Agree one way of working: procedures, records and responsibilities.

04
Implement
Put it in place with your teams and suppliers, with training on site.

05
Digitise
Move records, evidence and workflows into the platform where it helps.

06
Monitor
Keep status current, close actions and prepare for each review.
