Buyers, Brands and Importers Sourcing from India

Apply your sourcing requirements across your Indian supplier base, with on-ground support and one place to see status.

Advisory · Implementation · Digital

Who This Is For

- Brands and retailers
- Importers and traders
- Procurement and sourcing teams
- Sustainability and compliance teams

Where You Sit in the Supply Chain

PRODUCER → AGGREGATOR → PROCESSOR → MANUFACTURER → EXPORTER → **BUYER** (You)

You set the requirements. Your suppliers, several tiers away, have to meet them.

How S360 Works

Know the source › Build the evidence › Understand the risk › Take action › Be able to show it

What We Often Hear

- Supplier information arrives in many formats and languages.
- Certificate validity and scope are often checked late.
- On-ground verification in India is hard to arrange from a distance.
- Requirements are rolled out, but follow-up can stall.

What S360 Does

The same integrated capability, scoped around what your customers, markets and requirements ask of you.

Advisory

Understand

- Supplier base mapping and risk segmentation
- Requirements that suppliers can realistically meet
- Where to act first

Implementation

Put it in place

- Supplier onboarding and capacity building
- On-ground assessments and verification
- Corrective action follow-up

Digital

Keep it running

- Buyer requirements applied across suppliers
- Certificate status across the supplier base
- Connection to procurement and ERP systems

Requirements This Covers

Your own sourcing policy

EUDR due diligence

Scheme claims on purchased products

Social and labour expectations

S360 is the system, not the requirement. Standards, regulations and buyer requirements are inputs; we build one way of working that answers them together. Contributes to SDG 12, Responsible Consumption and Production.

S360 is not a certification body. We support organisations in understanding applicable standards, implementing management systems, preparing evidence, conducting internal assessments and preparing for independent certification audits. Where certification is required, certification decisions are made independently by the relevant certification body.

Questions We Are Asked

Does S360 certify my organisation?

No. S360 is not a certification body. We help you prepare; certification decisions rest with independent certification bodies.

Can we use the digital platform on its own?

Yes. Modules may be used independently, inside an implementation engagement, or connected to the systems you already run.

Do you work with what we already have?

Yes. We start from your current procedures, records and systems, and keep what already works.

What Changes When the Record Is Digital

TODAY	WITH S360
Suppliers answer by email	Suppliers answer in one structured system
Status assembled for each review	Status visible for each supplier and requirement
Follow-up depends on who remembers	Each action has an owner and a due date

Supplier & Vendor Management

Registration, KYC, documentation, qualification and approval — the journey from supplier to registered vendor.

Certificate & Standards Management

Track third-party certificates, standards, scopes, validity, expiry, suppliers, sites and products.

Integration

Built to connect to the systems your supply-chain data already lives in.

Services are scoped around each organisation's requirements. Digital modules may be offered independently, as part of implementation engagements, or as integrated solutions.

How We Work With You

01
Scope
Understand your supply base, customers and the requirements you face.

02
Assess
Review current practice, records and risk against those requirements.

03
Design
Agree one way of working: procedures, records and responsibilities.

04
Implement
Put it in place with your teams and suppliers, with training on site.

05
Digitise
Move records, evidence and workflows into the platform where it helps.

06
Monitor
Keep status current, close actions and prepare for each review.
