The S360 Platform on Its Own

Use the digital layer on its own, inside an implementation engagement, or connected to the systems you already run.

Advisory · Implementation · Digital

Who This Is For

- Organisations in forestry, aquaculture or agriculture
- Certified teams that need better records
- Groups and multisite operations
- Buyers managing large supplier bases

Where You Sit in the Supply Chain

PRODUCER (You) · AGGREGATOR (You) · PROCESSOR (You) · MANUFACTURER (You) · EXPORTER (You) · BUYER (You)

The platform works at any point in the chain, and connects the points to each other.

How S360 Works

Know the source › Build the evidence › Understand the risk › Take action › Be able to show it

What We Often Hear

- Records live in paper, spreadsheets, email and personal phones.
- Evidence is assembled for audits rather than kept ready.
- Supplier and certificate status is unknown until someone checks.
- Existing systems hold the data but not the compliance view.

What S360 Does

The same integrated capability, scoped around what your customers, markets and requirements ask of you.

Advisory

Understand

- Process review before anything is configured
- The data you need, and the data you can drop
- Roll-out plan for teams and suppliers

Implementation

Put it in place

- Configuration to your requirements
- Data migration from current records
- Training for staff and suppliers

Digital

Keep it running

- Supplier and vendor records
- Due diligence and risk
- Certificates and standards
- Connection to ERP, procurement, accounting and GIS

Requirements This Covers

Configured to the schemes, regulations and buyer requirements you need to meet

S360 is the system, not the requirement. Standards, regulations and buyer requirements are inputs; we build one way of working that answers them together. Contributes to SDG 12, Responsible Consumption and Production.

S360 is not a certification body. We support organisations in understanding applicable standards, implementing management systems, preparing evidence, conducting internal assessments and preparing for independent certification audits. Where certification is required, certification decisions are made independently by the relevant certification body.

Questions We Are Asked

Does S360 certify my organisation?

No. S360 is not a certification body. We help you prepare; certification decisions rest with independent certification bodies.

Can we use the digital platform on its own?

Yes. Modules may be used independently, inside an implementation engagement, or connected to the systems you already run.

Do you work with what we already have?

Yes. We start from your current procedures, records and systems, and keep what already works.

What Changes When the Record Is Digital

TODAY	WITH S360
Data in many places	Data, workflow and risk in one system
Evidence built before each audit	Evidence collected as work happens
Reports compiled by hand	Status and risk visible when you need them

Supplier & Vendor Management

Registration, KYC, documentation, qualification and approval — the journey from supplier to registered vendor.

Due Diligence Platform

Assessments, evidence, risk scoring, approvals, monitoring and reassessment.

Certificate & Standards Management

Track third-party certificates, standards, scopes, validity, expiry, suppliers, sites and products.

Integration

Built to connect to the systems your supply-chain data already lives in.

Services are scoped around each organisation's requirements. Digital modules may be offered independently, as part of implementation engagements, or as integrated solutions.

How We Work With You

01 Scope
Understand your supply base, customers and the requirements you face.

02 Assess
Review current practice, records and risk against those requirements.

03 Design
Agree one way of working: procedures, records and responsibilities.

04 Implement
Put it in place with your teams and suppliers, with training on site.

05 Digitise
Move records, evidence and workflows into the platform where it helps.

06 Monitor
Keep status current, close actions and prepare for each review.

Also in Across Sectors

- **Buyers, Brands and Importers Sourcing from India**
- **Suppliers Serving Several Buyers**

Supply-chain data and evidence turned into visibility, risk insight and action.

Tell us about your supply base and the requirements you are facing. We will scope the work around them.
