S360.earth

Farm Forestry and Plantation Groups

Keep every member, plot and harvest on record, so your group stays ready for assessment and your timber stays sellable.

Advisory · Implementation · Digital

Who This Is For

- Tree-grower groups
- Group managers working with farmers
- Plantation companies
- Wood-based industries with farm forestry programmes

Where You Sit in the Supply Chain

PRODUCER (You) → AGGREGATOR (You) → PROCESSOR → MANUFACTURER → EXPORTER → BUYER

You sit at the source. Claims made further down the chain depend on your records.

How S360 Works

Know the source › Build the evidence › Understand the risk › Take action › Be able to show it

What We Often Hear

- Member and land records are spread across village registers, phones and spreadsheets.
- Plot boundaries and GPS points are often incomplete, duplicated or out of place.
- Internal monitoring, sampling and management reviews can take weeks to prepare each year.
- Harvest volumes can be hard to reconcile against what mills say they received.

What S360 Does

The same integrated capability, scoped around what your customers, markets and requirements ask of you.

Advisory

Understand

- Group system design that fits your membership
- Environmental, social and high conservation value assessment approach
- Risk review across districts and species

Implementation

Put it in place

- Member onboarding and documented procedures
- Internal audits, sampling and management reviews
- Certification readiness and corrective action closure

Digital

Keep it running

- Member and plot register with geolocation
- Harvest declarations linked to plots
- Mobile checklists for internal monitoring visits

Requirements This Covers

- FSC forest management, group and smallholder
- PEFC forest management
- EUDR geolocation and due diligence
- Mill and buyer sourcing requirements

S360 is the system, not the requirement. Standards, regulations and buyer requirements are inputs; we build one way of working that answers them together. Contributes to SDG 15, Life on Land.

S360 is not a certification body. We support organisations in understanding applicable standards, implementing management systems, preparing evidence, conducting internal assessments and preparing for independent certification audits. Where certification is required, certification decisions are made independently by the relevant certification body.

Questions We Are Asked

Does S360 certify my organisation?

No. S360 is not a certification body. We help you prepare; certification decisions rest with independent certification bodies.

Can we use the digital platform on its own?

Yes. Modules may be used independently, inside an implementation engagement, or connected to the systems you already run.

Do you work with what we already have?

Yes. We start from your current procedures, records and systems, and keep what already works.

What Changes When the Record Is Digital

TODAY	WITH S360
Registers kept village by village	One searchable member and plot register
GPS points checked by hand before assessment	Gaps and outliers flagged as data is collected
Monitoring sample worked out in a spreadsheet each year	Sample drawn from live records, with visits logged against it

Traceability

Source-to-market mapping, with volumes that reconcile.

Document Management

Structured evidence and document lifecycle, retrievable by supplier, delivery or date.

Workflow

Configurable approval processes and corrective action to verified closure.

Services are scoped around each organisation's requirements. Digital modules may be offered independently, as part of implementation engagements, or as integrated solutions.

How We Work With You

01
Scope
Understand your supply base, customers and the requirements you face.

02
Assess
Review current practice, records and risk against those requirements.

03
Design
Agree one way of working: procedures, records and responsibilities.

04
Implement
Put it in place with your teams and suppliers, with training on site.

05
Digitise
Move records, evidence and workflows into the platform where it helps.

06
Monitor
Keep status current, close actions and prepare for each review.
