Farmer Producer Organisations and Aggregators

Keep one member register that serves every buyer programme, instead of starting again each season.

Advisory · Implementation · Digital

Who This Is For

- Farmer producer organisations
- Cooperatives
- Aggregators and collection centres
- NGOs running farmer programmes

Where You Sit in the Supply Chain

PRODUCER (You) → AGGREGATOR (You) → PROCESSOR → MANUFACTURER → EXPORTER → BUYER

You connect many farmers to the market. Buyers judge the whole group on your records.

How S360 Works

1. Know the source
2. Build the evidence
3. Understand the risk
4. Take action
5. Be able to show it

What We Often Hear

- Member data is collected again for each programme or buyer.
- Collection centre records are often not linked to members or plots.
- Buyers ask for training, labour and input-use evidence.
- Field staff change, and records can leave with them.

What S360 Does

The same integrated capability, scoped around what your customers, markets and requirements ask of you.

Advisory

Understand

- Programme fit and readiness review
- Internal control system design
- Member engagement approach

Implementation

Put it in place

- Member onboarding and records
- Internal inspections and training
- Readiness for buyer and certification body audits

Digital

Keep it running

- Member and plot register
- Collection records linked to members
- Programme-wise evidence packs

Requirements This Covers

Buyer and sustainability programmes

Group certification schemes

EUDR where commodities are in scope

S360 is the system, not the requirement. Standards, regulations and buyer requirements are inputs; we build one way of working that answers them together. Contributes to SDG 2, Zero Hunger.

S360 is not a certification body. We support organisations in understanding applicable standards, implementing management systems, preparing evidence, conducting internal assessments and preparing for independent certification audits. Where certification is required, certification decisions are made independently by the relevant certification body.

Questions We Are Asked

Does S360 certify my organisation?

No. S360 is not a certification body. We help you prepare; certification decisions rest with independent certification bodies.

Can we use the digital platform on its own?

Yes. Modules may be used independently, inside an implementation engagement, or connected to the systems you already run.

Do you work with what we already have?

Yes. We start from your current procedures, records and systems, and keep what already works.

What Changes When the Record Is Digital

TODAY	WITH S360
A new survey for each programme	One register reused across programmes
Collection slips on paper	Each collection linked to a member and plot
Records leave with field staff	Records stay with the organisation

Traceability

Source-to-market mapping, with volumes that reconcile.

Document Management

Structured evidence and document lifecycle, retrievable by supplier, delivery or date.

Analytics

Management dashboards, trends, risk views and performance analysis.

Services are scoped around each organisation's requirements. Digital modules may be offered independently, as part of implementation engagements, or as integrated solutions.

How We Work With You

01
Scope
Understand your supply base, customers and the requirements you face.

02
Assess
Review current practice, records and risk against those requirements.

03
Design
Agree one way of working: procedures, records and responsibilities.

04
Implement
Put it in place with your teams and suppliers, with training on site.

05
Digitise
Move records, evidence and workflows into the platform where it helps.

06
Monitor
Keep status current, close actions and prepare for each review.

Also in Agriculture & Food

- Oil Palm Growers, Groups and Mills
- Coffee, Rubber and Plantation Commodities
- Food and Agri Processors and Exporters

A producer group buyers can trust and return to.

Tell us about your supply base and the requirements you are facing. We will scope the work around them.
