Hatcheries and Feed Mills

Give your farm customers the seed and feed evidence their buyers and auditors are asking for.

Advisory · Implementation · Digital

Who This Is For

- Shrimp and fish hatcheries
- Broodstock and nursery units
- Aquafeed mills
- Feed ingredient suppliers

Where You Sit in the Supply Chain

PRODUCER (You) · AGGREGATOR · PROCESSOR (You) · MANUFACTURER · EXPORTER · BUYER

You supply the inputs that farm records depend on.

How S360 Works

Know the source › Build the evidence › Understand the risk › Take action › Be able to show it

What We Often Hear

- Seed and broodstock lots can be hard to trace to the farms that stocked them.
- Farm customers need your documents for their own audits.
- Feed ingredient origin, marine and plant, draws more buyer questions.
- Batch records live in production logs that are hard to search.

What S360 Does

The same integrated capability, scoped around what your customers, markets and requirements ask of you.

Advisory

Understand

- Gap assessment for hatchery or feed mill
- Ingredient sourcing risk review
- What your farm customers need from you

Implementation

Put it in place

- Lot and batch traceability procedures
- Ingredient supplier assessments
- Internal audits and certification readiness

Digital

Keep it running

- Seed lot and feed batch register linked to farm customers
- Ingredient supplier due diligence
- Shareable certificate and document packs

Requirements This Covers

BAP hatchery and feed mill standards

ASC feed requirements | SHAPHARI

Buyer responsible-sourcing requirements

S360 is the system, not the requirement. Standards, regulations and buyer requirements are inputs; we build one way of working that answers them together. Contributes to SDG 14, Life Below Water.

S360 is not a certification body. We support organisations in understanding applicable standards, implementing management systems, preparing evidence, conducting internal assessments and preparing for independent certification audits. Where certification is required, certification decisions are made independently by the relevant certification body.

Questions We Are Asked

Does S360 certify my organisation?

No. S360 is not a certification body. We help you prepare; certification decisions rest with independent certification bodies.

Can we use the digital platform on its own?

Yes. Modules may be used independently, inside an implementation engagement, or connected to the systems you already run.

Do you work with what we already have?

Yes. We start from your current procedures, records and systems, and keep what already works.

What Changes When the Record Is Digital

TODAY	WITH S360
Farm customers call for documents	Customers receive a ready pack per lot or batch
Ingredient origin known only by supplier name	Each ingredient supplier assessed and on record
Lot history kept in production logs	Lots traceable forward to the farms they supplied

Traceability

Source-to-market mapping, with volumes that reconcile.

Due Diligence Platform

Assessments, evidence, risk scoring, approvals, monitoring and reassessment.

Certificate & Standards Management

Track third-party certificates, standards, scopes, validity, expiry, suppliers, sites and products.

Services are scoped around each organisation's requirements. Digital modules may be offered independently, as part of implementation engagements, or as integrated solutions.

How We Work With You

01
Scope
Understand your supply base, customers and the requirements you face.

02
Assess
Review current practice, records and risk against those requirements.

03
Design
Agree one way of working: procedures, records and responsibilities.

04
Implement
Put it in place with your teams and suppliers, with training on site.

05
Digitise
Move records, evidence and workflows into the platform where it helps.

06
Monitor
Keep status current, close actions and prepare for each review.

Also in Aquaculture & Seafood
