Plywood, Veneer and Panel Manufacturers

Run chain of custody and supplier due diligence as one system, so the same findings stop coming back.

Advisory · Implementation · Digital

Who This Is For

- Plywood and veneer mills
- MDF and particle board plants
- Block board and door manufacturers
- Multisite panel groups

Where You Sit in the Supply Chain

PRODUCER → AGGREGATOR → **PROCESSOR** (You) → **MANUFACTURER** (You) → EXPORTER → BUYER

You turn many small inputs into branded products. Your supplier base is where much of the risk sits.

How S360 Works

Know the source › Build the evidence › Understand the risk › Take action › Be able to show it

What We Often Hear

- Many small suppliers, each with uneven documents and changing sources.
- Controlled Wood risk assessments and stakeholder consultations recur on tight timelines.
- Material accounting across mixed inputs is often done by hand and checked late.
- Corrective actions close on paper but can reappear at the next audit.

What S360 Does

The same integrated capability, scoped around what your customers, markets and requirements ask of you.

Advisory

Understand

- Supplier risk assessment by region and supply route
- Scope decisions ahead of audits and re-evaluations
- Sourcing strategy that protects your existing scope

Implementation

Put it in place

- Chain of custody and multisite procedures
- Supplier onboarding assessments with clear conditions
- Internal audits, management reviews and corrective action closure

Digital

Keep it running

- Supplier records, risk and approval status
- Certificate status for every supplier
- Batch material balance and corrective action tracking

Requirements This Covers

FSC chain of custody

FSC Controlled Wood and due diligence system

PEFC chain of custody

EUDR due diligence

Buyer and brand programmes

S360 is the system, not the requirement. Standards, regulations and buyer requirements are inputs; we build one way of working that answers them together. Contributes to SDG 15, Life on Land.

S360 is not a certification body. We support organisations in understanding applicable standards, implementing management systems, preparing evidence, conducting internal assessments and preparing for independent certification audits. Where certification is required, certification decisions are made independently by the relevant certification body.

Questions We Are Asked

Does S360 certify my organisation?

No. S360 is not a certification body. We help you prepare; certification decisions rest with independent certification bodies.

Can we use the digital platform on its own?

Yes. Modules may be used independently, inside an implementation engagement, or connected to the systems you already run.

Do you work with what we already have?

Yes. We start from your current procedures, records and systems, and keep what already works.

What Changes When the Record Is Digital

TODAY	WITH S360
Supplier files in folders by year	Each supplier's documents, risk and status in one place
Certificate expiry noticed during the audit	Certificate status tracked: valid, expiring, expired
Corrective actions tracked in email threads	Each finding with an owner, evidence and a closure date

Supplier & Vendor Management

Registration, KYC, documentation, qualification and approval — the journey from supplier to registered vendor.

Certificate & Standards Management

Track third-party certificates, standards, scopes, validity, expiry, suppliers, sites and products.

Workflow

Configurable approval processes and corrective action to verified closure.

Services are scoped around each organisation's requirements. Digital modules may be offered independently, as part of implementation engagements, or as integrated solutions.

How We Work With You

01 Scope
Understand your supply base, customers and the requirements you face.

02 Assess
Review current practice, records and risk against those requirements.

03 Design
Agree one way of working: procedures, records and responsibilities.

04 Implement
Put it in place with your teams and suppliers, with training on site.

05 Digitise
Move records, evidence and workflows into the platform where it helps.

06 Monitor
Keep status current, close actions and prepare for each review.

Also in Forestry & Wood Products

- Farm Forestry and Plantation Groups
- Sawmills, Timber Depots and Traders
- Pulp, Paper and Board Mills
- Furniture, Handicraft, Printing and Packaging

Fewer surprises at audit, and a supplier base you can expand with confidence.

Tell us about your supply base and the requirements you are facing. We will scope the work around them.
